Sixth Annual IFIP WG 11.9 International Conference on Digital Forensics

Center for Information Security and Cryptography
University of Hong Kong
Hong Kong
January 3-6, 2010

The *IFIP Working Group 11.9 on Digital Forensics* (www.ifip119.org) is an active international community of scientists, engineers and practitioners dedicated to advancing the state of the art of research and practice in the emerging field of digital forensics. The *Sixth Annual IFIP WG 11.9 International Conference on Digital Forensics* will provide a forum for presenting original, unpublished research results and innovative ideas related to the extraction, analysis and preservation of all forms of electronic evidence. Papers and panel proposals are solicited. All submissions will be refereed by a program committee comprising members of the Working Group and other experts in the field. Papers and panel submissions will be selected based on their technical merit and relevance to IFIP WG 11.9. The conference will be limited to approximately sixty participants to facilitate interactions between researchers and intense discussions of critical research issues. Keynote lectures, revised papers and details of panel discussions will be published as an edited volume – the sixth in the series entitled *Research Advances in Digital Forensics* (Springer) in the summer of 2010. Revised and/or extended versions of selected papers from the conference will be published in special issues of one or more international journals.

Technical papers are solicited in all areas related to the theory and practice of digital forensics. Areas of special interest include, but are not limited to:

- Theories, techniques and tools for extracting, analyzing and preserving digital evidence
- Network forensics
- Portable electronic device forensics
- Digital forensic processes and workflow models
- Digital forensic case studies
- Legal, ethical and policy issues related to digital forensics
